TESTIMONIAL

Sir Ganga Ram Hospital

PERFORMANCE CERTIFICATE / TESTIMONIAL

14th November 2022

We are an eminent group of hospitals providing specialized medical services. One of our hospitals located at Rajendra Nagar, New Delhi has a BRICK BASEMENT built 50 years back. We were facing a significant challenge with this as, water leakage problems persisted since it was built and therefore, the space couldn't be used. This was having a negative effect on the strength of our structure and also a loss of space. Space is a critical for any busy, as, we are a most sought for hospital in this area and always short of beds for patients.

When we tried to address this basement leakage issues, professional consultant was engaged and they called for tendering process with GUNITING-the best available option, as suggested. We were reluctant with this, as, it involved breaking of walls and civil work.

One day a friend introduced Ajay, Director of AAYKA for this basement waterproofing stating that they specialize in WITHOUT DISMANTLING technologies. It sounded interesting and I, personally could evaluate the merit of the technology, as, SAVING us TIME and COST and somehow could trust AAYKA and took the call.

They were engaged for the Specialized work and they immediately understood the problem and blocked the leakage permanently. Today even after 4 years of using the Basement and lift pits there has been no leakage at all.

We are so thankful to AAYKA for providing this solution with his INVENTION-now PATENTED.

I wish him best wishes for all his endeavors and serve the nation.
